The Aeronautical Journal of the Royal Aeronautical Society

INCORPORATING THE INSTITUTION OF AERONAUTICAL ENGINEERS, THE HELICOPTER ASSOCIATION OF GREAT BRITAIN AND THE SOCIETY OF LICENSED AIRCRAFT ENGINEERS AND TECHNOLOGISTS

VOLUME LXXXXIV

JANUARY–DECEMBER 1990

SUBJECT INDEX

AERODYNAMICS

Aerodynamic design methods for transonic wings, Lock R. C., pp 1-16 (Jan.).
Viscous corrections on wings in incompressible flow, Sinhamahapatra K. P. and Basu B. C., pp 67-72 (Feb.).
Aerodynamic forces on a square section cylinder that is downstream to an identical cylinder, Luo S. C. and Teng T. C., pp 203-212 (June/July).
Gustave Eiffel — pioneer of experimental aerodynamics, Black J., pp 231-244 (Aug./Sept.).
Response of hang gliders to control, de Matteis G., pp 289-294 (Oct.).

AEROFOILS

The effects of aerofoil profile on wing buffet at low speeds, Luces C. A. and Maull D. J., pp 86-90 (Mar.).
Solution of Euler equations on unstructured grids for two-dimensional compressible flow, Stolcis L. and Johnston L. J., pp 181-195 (June/July). Errata, pp 260-264 (Aug./Sept.).

AIR TRAFFIC CONTROL

North Atlantic air traffic control, Berry P., pp 318/323 (Nov.).
Future aeronautic environment — FMS/ATC/pilot, Bachelier P. and Deque R., pp 341-343 (Dec.).

AIR TO AIR REFUELLING

The aerodynamic interference between tanker and receiver aircraft during air-to-air refuelling, Bloy A. W. and Trochalidis V., pp 165-171 (May).

BIRDSTRIKE

Prediction of penetration of curved metal stiffened panels due to birdstrike, Wisnom M. R., pp 313-317 (Nov.).

BOOK REVIEWS — AUTHORS

Acheson, D. J., Elementary Fluid Dynamics, p 265 (Aug./Sept.).
Allnutt, J. E., Satellite-to-ground radiowave propagation, pp 107-108 (Mar.).
Anderson, J. D., Hypersonic and High Temperature Gas Dynamics, p 220 (June/July).
Anderson, J. D., Introduction to Flight — Third Edition, p 265 (Aug./Sept.).
Bajpai, A. C., *et al.*, Advanced Engineering Mathematics — Second edition, p 365 (Dec.).
Bil, C., Development and Application of a Computer-based System for Conceptual Aircraft Design, p 137 (Apr.).
Billetter, D. R., Multifunction Array Radar, p 107 (Mar.).
Currie, N. C. (Ed.), Radar Reflectivity Measurement: Techniques & Applications — Second edition, p 176 (May).
Dowell, E. H. *et al.*, A Modern Course in Aeroelasticity — Second revised and enlarged edition, pp 137-138 (Apr.).
Friedrich, K. (Ed.), Application of Fracture Mechanics to Composite Materials, p 295 (Oct.).
Gatewood, R. E., Virtual Principles in Aircraft Structures: Vol. 1 — Analysis, Vol. 2 — Design, Plates, Finite Elements, p 176 (May).
Jones, R. T., Wing Theory, p 324 (Nov.).
Klaasen, K. B. and van Peppen, J. C. L., System Reliability: Concepts and Applications, p 36 (Jan.)
Maffet, A. L., Topics for a Statistical Description of Radar Cross Section, p 75 (Feb.).
Massey, B. S., Mechanics of Fluids — Second edition, p 107 (Mar.).
Mortenson, M. E., Computer Graphics: an Introduction to the Mathematics and Geometry, p 137 (Apr.).
Nixon, D. (Ed.), Unsteady Transonic Aerodynamics, p 220 (June/July).
Oates, G. C. (Ed.), Aircraft Propulsion Systems: Technology and Design, pp 176-177 (May).
Parker, S. P. (Ed.), McGraw-Hill Dictionary of Scientific and Technical Terms — Fourth Edition, p 36 (Jan.)
Raymer, D. P., Aircraft Design: a Conceptual Approach, p 324 (Nov.).
Rimrott, F. P. J., Introductory Orbit Dynamics, p 295 (Oct.).
Sayer, F. P. and Bones, J. A., Applied Mechanics: a modern approach, p 324 (Nov.).
Seddon, J., Basic Helicopter Aerodynamics: an account of first principles in the flight mechanics and flight dynamics of the single rotor helicopter, p 295 (Oct.).
Standing, A. F., Measurement Techniques for In-Orbit Testing of Satellites, p 365 (Dec.).
Straub, D., Thermofluiddynamics of Optimized Rocket Propulsions: Extended Lewis Code Fundamentals, p 75 (Feb.).
Vinson, J. R., The Behaviour of Thin Walled Structures: Beams, Plates and Shells, pp 36-37 (Jan.).
Wiesel, W. E., Spaceflight Dynamics, p 265 (Aug./Sept.).
Young, A. D., Boundary Layers, p 75 (Feb.).

BOOK REVIEWS — TITLES

A Modern Course in Aeroelasticity — Second revised and enlarged edition, Dowell, E. H. *et al.*, pp 137-138 (Apr.).
Advanced Engineering Mathematics — Second edition, A. C. Bajpai *et al.*, pp 365 (Dec.)
Aircraft Design: a Conceptual Approach, Raymer, D. P., p 324 (Nov.).
Aircraft Propulsion Systems: Technology and Design, Oates, G. C., pp 176-177 (May).
Application of Fracture Mechanics to Composite Materials, Friedrich, K. (Ed.), p 296 (Oct.).
Applied Mechanics: a modern approach, Sayer, F. P. and Bones, J. A., p 324 (Nov.).
Basic Helicopter Aerodynamics: an account of the first principles in the flight mechanics and flight dynamics of the single rotor helicopter, Seddon, J., p 295 (Oct.).
Boundary Layers, Young, A. D., p 75 (Feb.).
Computer Graphics: an Introduction to the Mathematics and Geometry, Mortenson, M. E., p 137 (Apr.).
Development and Application of a Computer-based System for Conceptual Aircraft Design, Bil, C., p 137 (Apr.).
Elementary Fluid Dynamics, Acheson, D. J., p 265 (Aug./Sept.).
Hypersonic and High Temperature Gas Dynamics, Anderson, J. D., p 220 (June/July).
Introduction to Flight — Third Edition, Anderson, J. D., p 265 (Aug./Sept.).
Introductory Orbit Dynamics, Rimrott, F. P. J., p 295 (Oct.).
McGraw-Hill Dictionary of Scientific and Technical Terms — Fourth edition, Parker, S. P. (Editor), p 36 (Jan.).
Measurement Techniques for In-Orbit Testing of Satellites, A. F. Standing, p 365 (Dec.).
Mechanics of Fluids — Sixth edition, Massey, B. S., p 107 (Mar.).
Multifunction Array Radar, Billetter, D. R., p 107 (Mar.).
Radar Reflectivity Measurement: Techniques & Applications — Second edition, Currie, N. C. (Ed.), p 176 (May.).
Satellite-to-ground radiowave propagation, Allnutt, J. E., pp 107-108 (Mar.).
Spaceflight Dynamics, Wiesel, W. E., p 265 (Aug./Sept.).
System reliability: Concepts and Applications, Klaasen, K. B. and van Peppen, J. C. L., p 36 (Jan.).
The Behaviour of Thin Walled Structures: Beams, Plates and Shells, Vinson, J. R., pp 36-37 (Jan.).
Thermofluiddynamics of Optimized Rocket Propulsions: Extended Lewis Code Fundamentals, Straub, D., p 75 (Feb.).
Topics for a Statistical Description of Radar Cross Section, Maffet, A. L., p 75 (Feb.).
Unsteady Transonic Aerodynamics, Nixon, D. (Ed.), p 220 (June/July).
Virtual Principles in Aircraft Structures: Vol. 1— Analysis, Vol. 2 — Design, Plates, Finite Elements, Gatewood, R. E., p 176 (May).
Wing Theory, Jones, R. T., p 324 (Nov.).

BOUNDARY LAYERS

Turbulent boundary layers under small harmonic progressive oscillations of the free stream, Lam C. Y., pp 251-259 (Aug./Sept.).

BUCKLING AND INSTABILITY OF STRUCTURES

Structural analog for sandwich panels with finite deflections, Al-Qarra H. H., pp 99-106 (Mar.).
Crack tip stress intensity factors calculated by dual finite element analysis, Allman D. J., pp 132-136 (Apr.).
Prediction of penetration of curved metal stiffened panels due to birdstrike, Wisnom M. R., pp 313-317 (Nov.).

The Aeronautical Journal of the Royal Aeronautical Society

INCORPORATING THE INSTITUTION OF AERONAUTICAL ENGINEERS, THE HELICOPTER ASSOCIATION OF GREAT BRITAIN AND THE SOCIETY OF LICENSED AIRCRAFT ENGINEERS AND TECHNOLOGISTS

VOLUME LXXXXIV

Mechanics of Fluids — Sixth edition, Massey, B. S., p 107 (Mar.).
Multifunction Array Radar, Billetter, D. R., p 107 (Mar.).
Radar Reflectivity Measurement: Techniques & Applications — Second edition, Currie, N. C. (Ed.), p 176 (May.).
Satellite-to-ground radiowave propagation, Allnutt, J. E., pp 107-108 (Mar.).
Spaceflight Dynamics, Wiesel, W. E., p 265 (Aug./Sept.).
System reliability: Concepts and Applications, Klaasen, K. B. and van Peppen, J. C. L., p 36 (Jan.).
The Behaviour of Thin Walled Structures: Beams, Plates and Shells, Vinson, J. R., pp 36-37 (Jan.).
Thermofluiddynamics of Optimized Rocket Propulsions: Extended Lewis Code Fundamentals, Straub, D., p 75 (Feb.).
Topics for a Statistical Description of Radar Cross Section, Maffet, A. L., p 75 (Feb.).
Unsteady Transonic Aerodynamics, Nixon, D. (Ed.), p 220 (June/July).
Virtual Principles in Aircraft Structures: Vol. 1— Analysis, Vol. 2 — Design, Plates, Finite Elements, Gatewood, R. E., p 176 (May).
Wing Theory, Jones, R. T., p 324 (Nov.).

BOUNDARY LAYERS

Turbulent boundary layers under small harmonic progressive oscillations of the free stream, Lam C. Y., pp 251-259 (Aug./Sept.).

BUCKLING AND INSTABILITY OF STRUCTURES

Structural analog for sandwich panels with finite deflections, Al-Qarra H. H., pp 99-106 (Mar.).
Crack tip stress intensity factors calculated by dual finite element analysis, Allman D. J., pp 132-136 (Apr.).
Prediction of penetration of curved metal stiffened panels due to birdstrike, Wisnom M. R., pp 313-317 (Nov.).

BUFFET
The effects of aerofoil profile on wing buffet at low speeds, Lucas C. A. and Maull D. J., pp 86-90 (Mar.).
Transonic buffet on a supercritical aerofoil, Lee B. H. K., pp 143-152 (May).
Alleviation of shock oscillations in transonic flow by passive controls, Raghunathan S., Hall D. E. and Mabey D. G., pp 245-250; (Aug./Sept.).

COMPUTER PROGRAMS
IMPACT: A computer program to aid missile system design, Markham K. C., pp 24-36 (Jan.).

COMPUTATIONAL GRIDS
Mixed structured-unstructured meshes for aerodynamic flow simulation, Weatherill N. P., pp 111-123 (Apr.).
Solution of Euler equations on unstructured grids for two-dimensional compressible flow, Stolcis L. and Johnston L. J., pp 181-195 (June/July). Errata, pp 260-264 (Aug./Sept.).

CONTROL SYSTEMS
Performance-robustness trade off of eigenstructure assignment applied to rotorcraft, Innocenti M. and Stanziola C., pp 124-131 (Apr.).

DESIGN AND DEVELOPMENT
Aerodynamic design methods for transonic wings, Lock R. C., pp 1-16 (Jan.).
IMPACT: A computer program to aid missile system design, Markham K. C., pp 24-36 (Jan.).
The development and design integration of a variable camber wing for long/medium range aircraft, Greff E., pp 301-312 (Nov.).
Advanced technology — constant challenge and evolutionary process, Schmitt D., pp 335-340 (Dec.).

DRAG
Drag-reduction test of riblets using ARE's high speed buoyancy propelled vehicle — MOBY-D, Choi K.-S., pp 79-85 (Mar.).
30th Lanchester Memorial Lecture — The wave drag of delta wings at supersonic speeds: a recent survey, Drougge G., pp-225-230 (Aug./Sept.).
Sting corrections to zero-lift drag of axisymmetric bodies in transonic flow, Viswanath P. R. and Rajendra G., pp 279-289 (Oct.).

FINITE ELEMENT ANALYSIS
Crack tip stress intensity factors calculated by dual finite element analysis, Allman D. J., pp 132-136 (Apr.).
Prediction of penetration of curved metal stiffened panels due to birdstrike, Wisnom M. R., pp 313-317 (Nov.).

FLIGHT SIMULATION
Aircraft program along a predetermined trajectory.
Part I. Mathematical modelling, Blajer W., and Parczewski J., pp 17-23 (Jan.).
Part II. Numerical simulation with application of spline functions to trajectory definitions, Blajer W., pp 53-58 (Feb.).
The aerodynamic interference between tanker and receiver aircraft during air-to-air refuelling, Bloy A. W. and Trochalidis V., pp 165-171 (May).
Pilot modelling techniques for the analysis of aircraft linear dynamic behaviour, Innocenti M. and Minciotti R. L., pp 153-164 (May).
Response of hang gliders to control, de Matteis G., pp 289-294 (Oct.).
Prediction of the dynamic characteristics of helicopters in constained flight, Bradley R. and Thomson D. G., pp 344-354 (Dec.).

FLOW VISUALISATION
Practical developments in holographic interferometry, Parker R. J., pp 91-98 (Mar.).
An investigation of supersonic oscillatory cavity flows driven by thick shear layers, Zhang X. and Edwards J. A., pp 355-364 (Dec.).

FLUID DYNAMICS: FLOW
Viscous corrections on wings in incompressible flow, Sinhamahapatra K. P. and Basu B. C., pp 67-72 (Feb.).
Mixed structured-unstructured meshes for aerodynamic flow simulation, Weatherill N. P., pp 111-123 (Apr.).
Solution of Euler equations on unstructured grids for two-dimensional compressible flow, Stolcis L. and Johnston L. J., pp 181-195 (June/July). Errata, pp 260-264 (Aug./Sept.).
Separated flow about a wedge, Bandyopadhyay G. and Mukherjee S., pp 196-202 (June/July).
Aerodynamic forces on a square section cylinder that is downstream to an identical cylinder, Luo S. C. and Teng T. C., pp 203-212 (June/July).
Control of vortical separation on a circular cone, Mourtos N. J., pp 213-219 (June/July).
An investigation of supersonic oscillatory cavity flows driven by thick shear layers, Zhang X. and Edwards J. A., pp 355-364 (Dec.).

FLUID MECHANICS
The Inaugural Goldstein Memorial Lecture — Some challenging new applications for basic mathematical methods in the mechanics of fluids that were originally pursued with aeronautical aims, Sir James Lighthill, pp 41-52 (Feb.).

FLUTTER
Identification of time varying modal parameters, Cooper J. E., pp 271-278 (Oct.).

HANG GLIDERS
Response of hang gliders to control, de Matteis G., pp 289-294 (Oct.).

HISTORICAL
Early flight attempts, real and unreal, Hart C., pp 73-74 (Feb.).
Gustave Eiffel — pioneer of experimental aerodynamics, Black J., pp 231-244 (Aug./Sept.).

HOLOGRAPHY
Practical developments in holographic interferometry, Parker R. J., pp 91-98 (Mar.).

KITES
Kite performance measurements in natural wind, Hobbs S. E., pp 59-66 (Feb.).

LINEAR DYNAMICS
Pilot modelling techniques for the analysis of aircraft linear dynamic behaviour, Innocenti M. and Minciotti R. L., pp 153-164 (May).

MAINTENANCE
Maintenance standards, Cumming A., pp 329-334 (Dec.).

MISSILES
IMPACT: A computer program to aid missile system design, Markham K. C., pp 24-36 (Jan.).

PHOTOGRAPHS
Boundary layers
Magnified image of the boundary layer at the aerofoil surface. 'Finite' fringes have been added to allow extraction of the boundary layer profile, p 95 (Mar.).

Fan blades
View up the fan-rig intake showing large viewing window, laser input window and background, p 96 (Mar.).
Holography in fan testing, p 96 (Mar.).

Flow visualisation
Flow visualisation by Kokshaysky of the vortex wake shed behind a flying chaffinch, p 46 (Feb.).
One of 100 different stereo-pairs of flow visualisations made and painstakingly analysed by Spedding *et al* for the vortex wake behind a flying pigeon, p 47 (Feb.).
Holographic visualisation of a flow through a life-size labyrinth seal model. 207 kPa pressure drop, flow from right to left, p 93 (Mar.).
Gas flow inside a gas filled light bulb observed in real-time using thermoplastic recording materials, p 93 (Mar.).
Holographic fringes form iso-density contours in a two-dimensional cascades of turbine blade profiles, p 94 (Mar.).
Comparison between holographic iso-density map and computer generated density contours, p 94 (Mar.).
Rapid double exposure (100 s separation delineates unsteady shocks and turbulent wakes, p 94 (Mar.).
Magnified image of the wake from a turbine cascade showing the high resolution which can be achieved, p 94 (Mar.).
Double exposure holograms showing flow from a swirler nozzle with cold CO_2 flowing throught it, p 95 (Mar.).
Rapid double exposure (100 s separation) of swirler nozzle, p 95 (Mar.).
Y/D = 1, L/D = 2; channelling effects, p 206 (June/July).
Y/D = 1, L/D = 4; positive vortex sheet proximity effect, p 207 (June/July).
Y/D = 3, L/D = 6; negative vortex sheet proximity effect, p 207 (June/July).
Y/D = 0, L/D = 3; reattached flow, p 208 (June/July).
Y/D = 0, L/D = 4; co-shedding flow, p 208 (June/July).
Oil flow visualisation at Mach 1·5, for the L/D = 3 cavity, p 357 (Dec.).
Absolute interferograms of the flow field with L/D = 1, p 357 (Dec.).
A series of absolute interferograms at different points in the oscillatory cycle at Mach 1·5, L/D = 3, p 358 (Dec.).
Spark schlieren visualisation of the shear layer development over the cavity, p 360 (Dec.).
Differential interferograms demonstrating the shear layer deflection due to the convection of large vortical structures, p 360 (Dec.).

Miscellaneous
MOBY-D getting ready for trial, p 80 (Mar.).
MOBY-D at the broaching, p 80 (Mar.).
Eiffel with free-fall apparatus descending from Tower, p 233 (Aug./Sept.).
The Clearance Delivery suite at Prestwick where in-flight requests for westbound oceanic clearance are input and relayed to flights, p 321 (Nov.).
Oceanic Planning Controllers with their air traffic and interactive computer displays, Atlantic House, Prestwick, p 322 (Nov.).
Shanwick Aeradio operators situated at their station north of Shannon airport, provide the link between air traffic over the North Atlantic Ocean and the Oceanic En Route Controllers at Prestwick, p 322 (Nov.).

Wind tunnels
Wind tunnel test section with tanker wing traverse and receiver aircraft model, p 167 (May).
Gustave Eiffel standing with an aircraft mounted on the balance in the open-jet working section of the Auteil wind tunnel, p 238 (Aug./Sept.).

REMOTE SENSING
The Earth Observation Data Centre and its task, Waggett P. W., pp 172-175 (May).

RIBLETS
Drag-reduction test of riblets using ARE's high speed buoyancy propelled vehicle — MOBY-D, Choi K.-S., pp 79-85 (Mar.).

ROTORCRAFT
Performance-robustness trade off of eigenstructure assignment applied to rotorcraft, Innocenti M. and Stanziola C., pp 124-131 (Apr.).
Prediction of the dynamic characteristics of helicopters in constained flight, Bradley R. and Thomson D. G., pp 344-354 (Dec.).

ROYAL AERONAUTICAL SOCIETY: LECTURES
Aerodynamic design methods for transonic wings, Lock R. C., pp 1-16 (Jan.).
IMPACT: A computer program to aid missile system design, Markham K. C., pp 24-36 (Jan.).
The Inaugural Goldstein Memorial Lecture — Some challenging new applications for basic mathematical methods in the mechanics of fluids that were originally pursued with aeronautical aims, Sir James Lighthill, pp 41-52 (Feb.).
30th Lanchester Memorial Lecture — The wave drag of delta wings at supersonic speeds: a recent survey, Drougge G., pp 225-230 (Aug./Sept.).
North Atlantic air traffic control, Berry P., pp 318-323 (Nov.).

ROYAL AERONAUTICAL SOCIETY: SYMPOSIA
FLOW VISUALISATION USING LASER TECHNIQUES
Practical developments in holographic interferometry, Parker R. J., pp 91-98 (Mar.).
THIRD EUROPEAN AEROSPACE CONFERENCE — CIVIL AVIATION OPERATIONS PROBLEMS, SOLUTIONS AND ACTIONS
Future aeronautic environment — FMS/ATC/pilot, Bachelier P. and Deque R., pp 341-343 (Dec.).
Maintenance standards, Cumming A., pp 329-334 (Dec.).
Advanced technology — constant challenge and evolutionary process, Schmitt D., pp 335-340 (Dec.).

SHOCK
Alleviation of shock oscillations in transonic flow by passive controls, Raghunathan S., Hall D. E. and Mabey D. G., pp 245-250 (Aug./Sept.).

STRUCTURES AND STRUCTURAL DESIGN
Structural analog for sandwich panels with finite deflections, Al-Qarra H. H., pp 99-106 (Mar.).
Crack tip stress intensity factors calculated by dual finite element analysis, Allman D. J., pp 132-136 (Apr.).
Identification of time varying modal parameters, Cooper J. E., pp 271-278 (Oct.).
The development and design integration of a variable camber wing for long/medium range aircraft, Greff E., pp 301-312 (Nov.).
Prediction of penetration of curved metal stiffened panels due to birdstrike, Wisnom M. R., pp 313-317 (Nov.).

TESTING
Sting corrections to zero-lift drag of axisymmetric bodies in transonic flow, Viswanath P. R. and Rajendra G., pp 279-289 (Oct.).

TURBULENCE
Turbulent boundary layers under small harmonic progressive oscillations of the free stream, Lam C. Y., pp 251-259 (Aug./Sept.).

VIBRATION
Identification of time varying modal parameters, Cooper J. E., pp 271-278 (Oct.).

VORTICES
Control of vortical separation on a circular cone, Mourtos N. J., pp 213-219 (June/July).

WIND TUNNELS
Gustave Eiffel — pioneer of experimental aerodynamics, Black J., pp 231-244 (Aug./Sept.).

WIND
Kite performance measurements in natural wind, Hobbs S. E., pp 59-66 (Feb.).

WINGS
Aerodynamic design methods for transonic wings, Lock R. C., pp 1-16 (Jan.).
Viscous corrections on wings in incompressible flow, Sinhamahapatra K. P. and Basu B. C., pp 67-72 (Feb.).
30th Lanchester Memorial Lecture — The wave drag of delta wings at supersonic speeds: a recent survey, Drougge G., pp 225-230 (Aug./Sept.).
The development and design integration of a variable camber wing for long/medium range aircraft, Greff E., pp 301-312 (Nov.).

AUTHOR INDEX

AL-QARRA, H. H.
Structural analog for sandwich panels with finite deflections, pp 99-106 (Mar.).

ALLMAN, D. J.
Crack tip stress intensity factors calculated by dual finite element analysis, pp 132-136 (Apr.).

BACHELIER, P. and DEQUE, R.
Future aeronautic environment — FMS/ATC/pilot, pp 341-343 (Dec.).

BASU, B. C. AND SINHAMAPTRA, K. P.
Viscous corrections on wings in incompressible flow, pp 67-72 (Feb.).

BANDYOPADHYAY, G. and MUKHERJEA, S.
Separated flow about a wedge, pp 196-202 (June/July).

BERRY P.
North Atlantic air traffic control, pp 318-325 (Nov.).

BLACK, J.
Gustave Eiffel — pioneer of experimental aerodynamics, pp 231-244 (Aug./Sept.).

BLAJER, W. and PARCEWSKI, J.
Aircraft program motion along a predetermined trajectory. Part I. Mathematical modelling, pp 17-23 (Jan.).

BLAJER, W.
Aircraft program motion along predetermined trajectory. Part II. Numerical simulation with application of spline functions to trajectory definitions, pp 53-58. (Feb.).

BLOY, A. W. and TROCHALIDIS, V.
The aerodynamic interference between tanker and receiver aircraft during air-to-air refuelling, pp 165-171 (May).

BRADLEY, R. and THOMSON, D. G.
Prediction of the dynamic characteristics of helicopters in constrained flight, pp 344-354 (Dec.).

CHOI, K.-S.
Drag-reduction test of riblets using ARE's high speed buoyancy propelled vehicle — MOBY-D, pp 79-90 (Mar.).

COOPER, J. E.
Identification of time varying modal parameters, pp 271-278 (Oct.).

CUMMING, A. C. D.
Maintenance standards, pp 329-334 (Dec.).

DE MATTEIS, G.
Response of hang gliders to control, pp 289-294 (Oct.).

DEQUE, R. and BACHELIER, P.
Future aeronautic environment — FMS/ATC/pilot, pp 341-343 (Dec.).

DROUGGE, G.
30th Lanchester Memorial Lecture — The wave drag of delta wings at supersonic speeds: a recent study, pp 225-230 (Aug./Sept.).

EDWARDS, J. A. and ZHANG, X.
An investigation of supersonic oscillatory cavity flows driven by thick shear layers, pp 355-364.

GREFF, E.
The development and design integration of a variable camber wing for long/medium range aircraft, pp 301-312 (Nov.).

HALL, D. E., MABEY, D. G. and RAGHUNATHAN, S.
Alleviation of shock oscillations in transonic flow by passive controls, pp 245-250 (Aug./Sept.).

HART, C.
Early flight attempts, real and unreal, pp 73-74 (Feb.).

HOBBS, S. E.
Kite performance measurements in natural wind, pp 59-66 (Feb.).

INNOCENTI, M. and MINCIOTTI, R. L.
Pilot modelling techniques for the analysis of aircraft linear dynamic behaviour, pp 153-164 (May).

INNOCENTI, M. and STANZIOLA, M.
Performance-robustness trade off of eigenstructure assignment applied to rotorcraft, pp 124-131 (Apr.).

JOHNSTON, L. J. and STOLCIS, L.
Solution of Euler equations and unstructured grids for two-dimensional compressible flow, pp 181-195 (June/July). Errata, pp 260-264 (Aug./Sept.).

LAM, C. Y.
Turbulent boundary layers under small harmonic progressive oscillations of the free stream, pp 251-259 (Aug./Sept.).

LEE, B. H. K.
Transonic buffet on a supercritical aerofoil, pp 143-152 (May).

LIGHTHILL, Sir James
The Inaugural Goldstein Memorial Lecture — Some challenging new applications for basic mathematical methods in the mechanics of fluids that were originally pursued with aeronautical aims, pp 41-52 (Feb.).

LOCK, R. C.
Aerodynamic design methods for transonic wings, pp 1-16 (Jan.).

LUCAS, C. A. and MAULL, D. J.
The effects of aerofoil profile on wing buffet at low speeds, pp 86-90 (Mar.).

LUO, S. C. and TENG, T. C.
Aerodynamic forces on a square section cylinder that is downstream to an identical cylinder, pp 203-212 (June/July).

MABEY, D. G., RAGHUNATHAN, S. and HALL, D. E.
Alleviation of shock oscillations in transonic flow by passive controls, pp 245-250 (Aug./Sept.).

MARKHAM, K. C.
IMPACT: A computer program to aid missile system design, pp 24-35 (Jan.).

MAULL, D. J. and LUCAS, C. A.
The effects of aerofoil profile on wing buffet at low speeds, pp 86-90 (Mar.).

MINCIOTTI, R. L. and INNOCENTI, M.
Pilot modelling techniques for the analysis of aircraft linear dynamic behaviour, pp 153-164 (May).

MOURTOS, N. J.
Control of vortical separation on a circular cone, pp 213-219 (June/July).

MUKHERJEA, S. and BANDYOPADHYAY, G.
Separated flow about a wedge, pp 196-202 (June/July).

PARCEWSKI, J. and BLAJER, W.
Aircraft program motion along a predetermined trajectory. Part 1. Mathematical modelling, pp 17-23 (Jan).

PARKER, R. J.
Practical developments in holographic interferometry, pp 91-98 (Mar.).

RAGHUNATHAN, S., HALL, D. E. and MABEY, D. G.
Alleviation of shock oscillations in transonic flow by passive controls, pp 245-250 (Aug./Sept.).

RAJENDRA, G. and VISWANATH, P. R.
Sting corrections to zero-lift drag of axisymmetric bodies in transonic flow, pp 279-289 (Oct.).

SCHMITT, D.
Advanced technology — constant challenge and evolutionary process, pp 335-340 (Dec.).

SINHAMAPATRA, K. P. and BASU, B. C.
Viscous corrections on wings in incompressible flow, pp 67-72 (Feb.).

STANZIOLA, C. and INNOCENTI, M.
Performance-robustness trade off of eigenstructure assignment applied to rotorcraft, pp 124-131 (Apr.).

STOLCIS, L. and JOHNSTON, L. J.
Solution of Euler equations on unstructured grids for two-dimensional compressible flow, pp 181-195 (June/July). Errata, pp 260-264 (Aug./Sept.).

TENG, T. C. and LUO, S. C.
Aerodynamic forces on a square section cylinder that is downstream to an identical cylinder, pp 203-212 (June/July).

THOMSON, D. G. and BRADLEY, R.
Prediction of the dynamic characteristics of helicopters in constrained flight, pp 344-354 (Dec.).

TROCHALIDIS, V. and BLOY, A. W.
The aerodynamic interference between tanker and receiver aircraft during air-to-air refuelling, pp 165-171 (May).

VISWANATH, P. R. and RAJENDRA, G.
Sting corrections to zero-lift drag of axisymmetric bodies in transonic flow, pp 279-289 (Oct.).

WAGGETT, P. W.
The Earth Observation Data Centre and its task, pp 172-175 (May).

WEATHERILL, N. P.
Mixed structured-unstructured meshes for aerodynamic flow simulation, pp 111-123 (Apr.).

WISNOM, M. R.
Prediction of penetration of curved metal stiffened panels due to birdstrike, pp 313-317 (Nov.).

ZHANG, X. and EDWARDS, J. A.
An investigation of supersonic oscillatory cavity flows driven by thick shear layers, pp 355-364 (Dec.).

The Aeronautical Journal

The Editorial Staff would like to thank the Associate Editors, Professor L. F. Crabtree and Mr D. H. Peckham for their considerable help during 1990. In addition sincere thanks are extended to all referees. Those who assisted on papers which reached a conclusion during 1990 are listed below.

D. J. Allman
M. J. A. Asbury
J. A. Bagley
D. E. H. Balmford
R. V. Barrett
E. A. Boyd
L. Bernstein
M. V. Cook
D. E. Davies
G. A. O. Davies
R. A. East
M. E. Eshelby
J. P. Fielding
P. W. Fortescue
B. C. Freeman
L. Gaudet
J. C. Gibson
R. Gibson
R. J. Golding
J. E. Green
A. B. Haines
J. K. Hammond
G. J. Hancock
C. Hart
J. K. Harvey
A. N. Hofton
D. Howe
L. J. Johnston
I. L. Jones
M. A. Jones
G. M. Lilley
D. G. Mabey
C. P. Massey
H. H. Pearcey
A. J. Ross
A. Simpson
J. H. B. Smith
D. M. Sykes
L. C. Squire
A. G. Thorning
J. P. H. Webber
P. G. Wilby
B. R. Williams
A. Young

We are also indebted to Mr John Shaw of ESDU International for his assistance in the preparation of the reports each month.
